

Rugged displays for industrial and defense application

Long-Life Design:

All PCQT products are designed for a long life. They are protected as much as possible against environmental contamination.

Customised

All PCQT Displays are first made for a specific customer and for a specific application. The initial product is made that way, that also other customers can use it. These rugged products can be ordered later from the shelf.

The standard products can be customised with relatively low cost.

Rackmount and Panelmount Displays

PCQT manufactures displays from

10" to 18".

DR18 - 18" 8U for 19" Racks

DP15 - 15" Panelmount Display:

CP10 - 10" panelmount Display Computer

Display for universal mount:

This rugged display with Name PCQT D156 has on each side three M6 nuts. This allows to make adaption to almost every location.

For racks the only 6U high display features optional hinge to give access to equipment behind.

Based on this platform a low power display computer was created: the C126 and C156.

Service Display:

12" display for IT service events on location. powered from computer or international plug adapter.

D188 rugged display

D188c completely in stainless and flat surfaces:

Hermetic Display:

For highest sealing requirements PCQT developed the D29M.
